

The Federal Communications Commission

Dear The Federal Communications Commission,

Please be advised that our family does not wish to pay more for our telephone service! As you know, the flat fee proposal that you are considering would change how contributions are made to the Universal Service Fund. You should be concerned that this proposal could make our families current service much less unaffordable.

Under the flat fee proposal you are considering, people who make few long distance calls would pay the same tariff as people or businesses that make many calls. This would mean that low-volume and many residential customers would bear the same universal service fund burden as a high-volume residential or business customer. Please pay attention. This proposal is simply unfair!

We use our wireless phone primarily for our safety, security and convenience. Those of us using cellular phones for this purpose do not wish to lose these benefits so that big businesses can pay less than their fair share. Kindly review this proposal closely. Those of us in this situation urge you to reject the proposal which moves the USF collection system to a flat-fee.

Save the low cost cellular phone system!

Please don't cave in to the big business interests. Keep the USF Fair!

Sincerely,

Ron Plough
